

As a Pressure Tester, you'll be:

- Loading/unloading cast metal parts; this is physical work
- Running tests to ensure parts are 100% leak-free
- Washing and drying; packing and tracking
- Maintaining a clean and organized work area
- Showing reliable attendance
- Taking safety seriously
- Sharing ideas on how to make your job better

Leave the **pressure** for the parts. Start a **great** career!

Pick your pressure ...

- Stay at your current job and continue to hear, "You need to work harder!"

OR

- Become a Pressure Tester and quality test our precisely machined cast metal parts

At Stecker Machine, we apply pressure to our parts, not our people! You should be **enjoying your job** every day and feel a sense of **accomplishment** every shift.

New to manufacturing? No problem! **No experience is needed.** We provide in-class and on-the-job training, setting you up to succeed and grow your manufacturing career. Pressure Tester is a great job to begin a manufacturing career.
